Supplied with
Integrated headset
Thomson seatpost
Seat post clamp

Capable of easily going down a hill that it can just as easily climb up, the Super 4 is our new XC marathon bike. Our R&D team spent two years of work on this project, and they have come up with a bike that has an output efficiency close to that of an XC bike. The added advantage of the COMMENCAL Contact System means lots of small-bump sensitivity for incredible grip and traction, but with a huge capacity to absorb big impacts without bottoming out. The Super 4 gives 100mm/4" of efficient travel so that you can have fun anywhere. Lightweight, fun, an excellent downhill performer, this is a real COMMENCAL. This bike offers performance for all the riders out there that love REAL mountain biking.
